## General Declaration

## Notes on Quality Control

LVU has been carrying out comparative laboratory tests since 1993. To ensure quality we work according to the following principles:

- Only personnel with the appropriate skills for the respective work steps are used. Both partners are state-certified food chemists with more than 25 years of experience in the performance of proficiency testing.
- The samples intended as test items in proficiency tests are tested for homogeneity by laboratories accredited according to DIN EN ISO/IEC 17025:2018-03.
  - Only if the test data show sufficient homogeneity for the performance of an interlaboratory comparison, the intended samples are used as test objects.
- The performance and evaluation of interlaboratory comparisons take into account all essential elements of the standards ISO 17043:2010-05 (Conformity assessment - General requirements for proficiency testing) and ISO 13528:2015-08 (statistical methods for use in proficiency testing by interlaboratory comparison).
- Accreditation according to ISO 17043:2010-05 is currently not yet mandatory. For this reason, LVU has waived accreditation so far.
  - Should LVU have an accreditation according to ISO 17043:2010-05 at a later date, we will inform you.
